THE SEE.SENSE PLATFORM

SEE.SENSE®

PATENT PENDING TECHNOLOGY

1\

Sensor technology gives the lights situational awareness.

2\

Advanced algorithms identify crash & theft events in real time.

Development of near-miss events and detection of potholes is underway with a pilot study in Northern Ireland and with our kickstarter beta testers around the world.

NEXT STEPS

1\\

Identify pilot city for data capture and analysis.

2\\

Building the cyclist community.

3\\

Partner with cities and organisations to collect mass data and collaborate on tailored software and analysis.
