

# The freedom of choice

*Renewed advocacy in the Netherlands*

Saskia Kluit,  
CEO Fietsersbond  
Board Dutch Cycling Embassy

Fietsersbond

**Mission:**

**safe, comfortable and pleasurable cycling for everyone**

**...by advocacy, consumer info and services**

**...supported by app. 33.000 members and app. 10.000 sympathisers on social media**

**...25 employees, 150 local branches and 1500 volunteers**

**The Fietzersbond:**

- **In the 27% of total trips are made on a bicycle (of a 50% total for all active modes)**
  - 9 % growth in bike km since 2004,
  - mainly due to growing usage of e-bikes

**On average each Dutch person cycles about 1000 km a year & people tend to accept twice the distance on an e-bike**

- **22 mln bikes in NL,**
  - 1 mln new bikes a year
  - of which 25% e-bikes
  - (speedpedelec: growth of 30% in 2015..)
- **47% of all trips to the train stations are made by bike**
- **E-bikes became a great stimulus for cycling as a whole and especially for recreation and bike2work-schemes**

**The numbers:**

But improve we must....;-)

An aerial photograph of a modern cable-stayed bridge at dusk. The bridge features a central roadway with multiple lanes, flanked by elevated bicycle paths on both sides. The bridge is supported by a central pylon and numerous stay cables. The scene is illuminated by streetlights and the bridge's own lighting, creating a warm glow against the darkening sky. The background shows a cityscape with buildings and greenery.

..So we needed something new....

# The Dawning of the NEW Dutch Bicycle Alliance:

## 4 examples:

- Crowd management for the Tour de France
- The 'Fietstelweek', a consultancy collaboration
- The Vrienden van de Fietzersbond (Friends of..): building better infra
- Fiets file Vrij or Dancing through the public scales

# Crowd management:

- Event management to promote day to day-cyclingtrips
- Promoting cycling to the city centre with the bicycle routes and pop-up bicycle parking
- Business collaboration: good routes, promotion, finance and parkingspots

## Results

- 20.000 temporary parkingspots through pop up parkings
- Alliance with private sector
- Promotion on regional cycling trips to Utrecht (>100.000)

Fiets...nd

# Consultancy: Fietstelweek

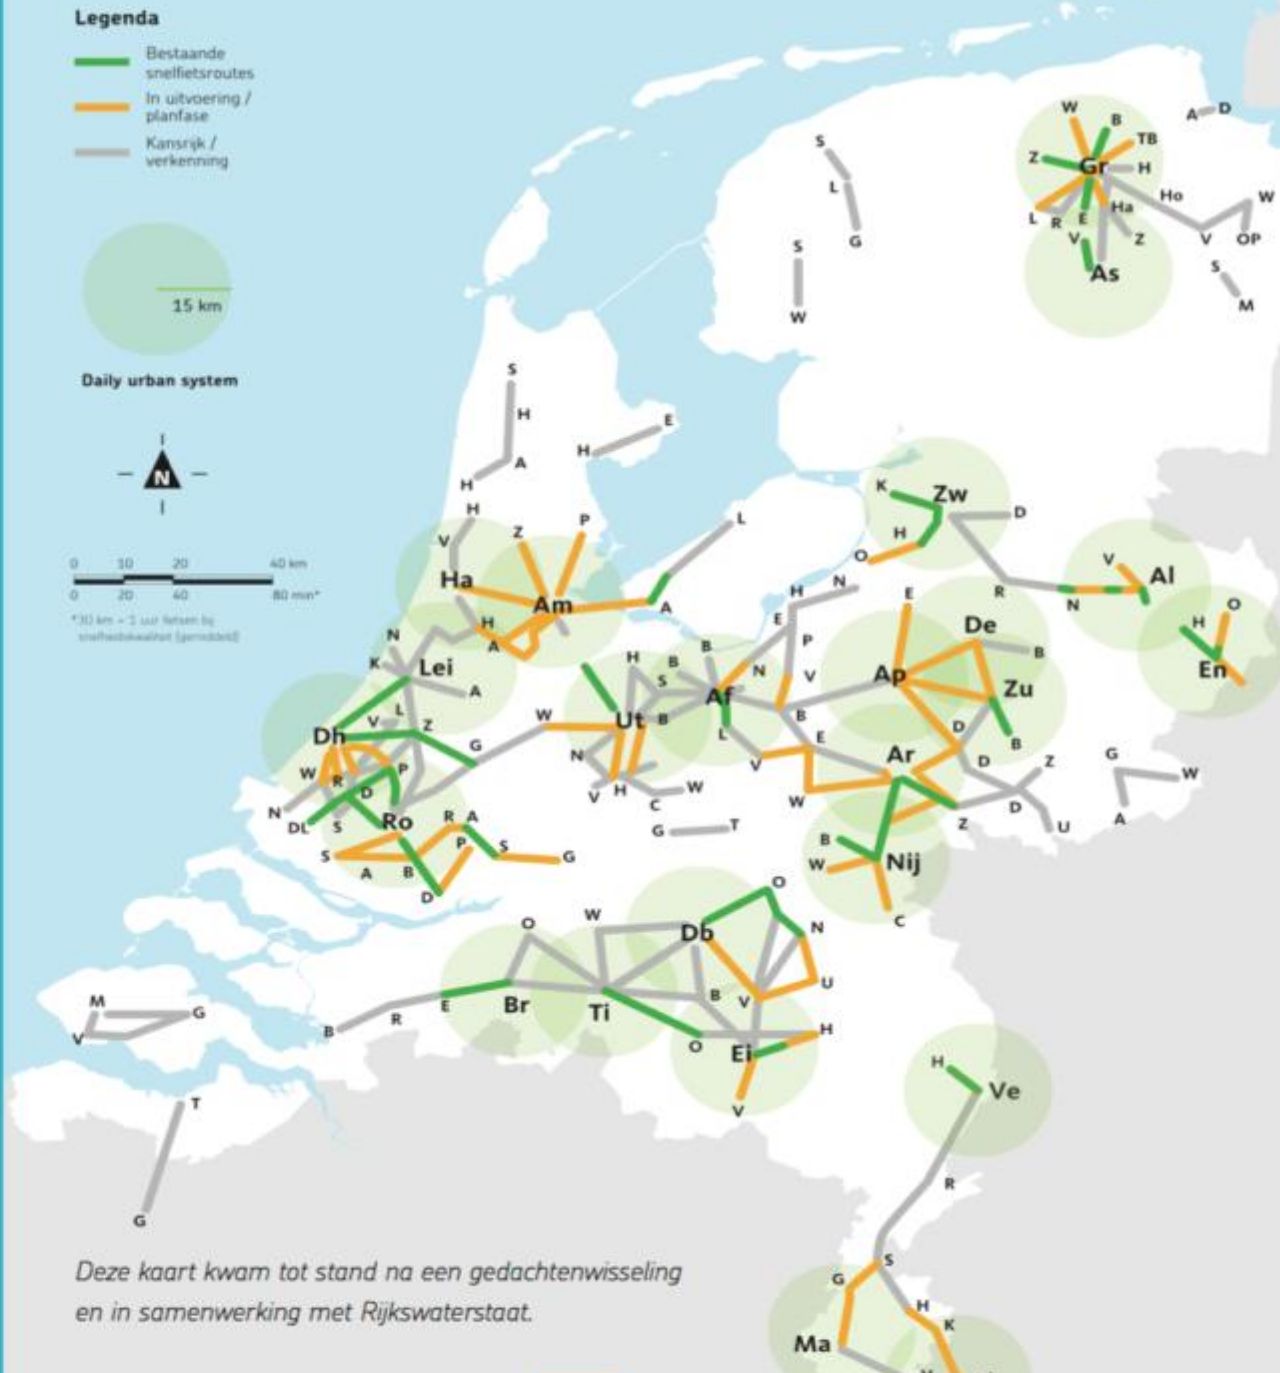

- An app to solve the problem: 'How to make cyclists count'
- Numbers, speed and routing
- Cooperation between consultancy, governments & NGO's
- Results:
  - Better data than traditional counting methods (research)
  - Good data for making and calibrating traffic models
  - Very good PR for Fietzersbond

# Building companies becoming 'Friends ..'

- **Useful in countries with:**
  - smaller governments & more public commission
  - more integrated tenders:
    - design, finance, built and maintenance
- **Result:**
  - Sponsorship for the Fietsersbond
  - Knowledge transfer to the right people
  - Advocacy in temporary situations increased

Figuur 2 – De stedelijke leefruimte waarbinnen mensen dagelijks wonen, werken, winkelen en recreëren wordt ook wel 'daily urban system' genoemd. In de metropoolregio Rotterdam – Den Haag is sprake van elkaar overlappende vervoersnetwerken. Snelfietsroutes bevinden zich vaak in deze tussengebieden.

Deze kaart kwam tot stand na een gedachtenwisseling en in samenwerking met Rijkswaterstaat.

- Increased public spending on bike-infra to solve car traffic jams
- National strategy and money combined with local knowledge of cycling and local money
- Both infra and bike promotion-schemes

### The result:

- Local government as big Cycling champions
  - With servants like Sjors, Martijn, Herbert..
  - And politicians from all collurs like Connie, Harriet, Alex, and Paul

**‘Super cycle highways’:  
Or how the Fietzersbond went automotive**

谢谢

Thank you!
