DESIGN STANDARDS: STRAITJACKET OR TICKET TO FREEDOM

Hillie Talens, project manager

**THERE IS MORE TO
CYCLING THAN
INFRASTRUCTURE?**

NOT JUST INFRASTRUCTURE

- 🚲 Logical part of society
- 🚲 Bicycle as default
- 🚲 Vehicle safety
- 🚲 Laws and regulations
- 🚲 Cycling inclusive policy
- 🚲 Smart environmental planning
- 🚲 Discourage car use
- 🚲 Bicycle parking

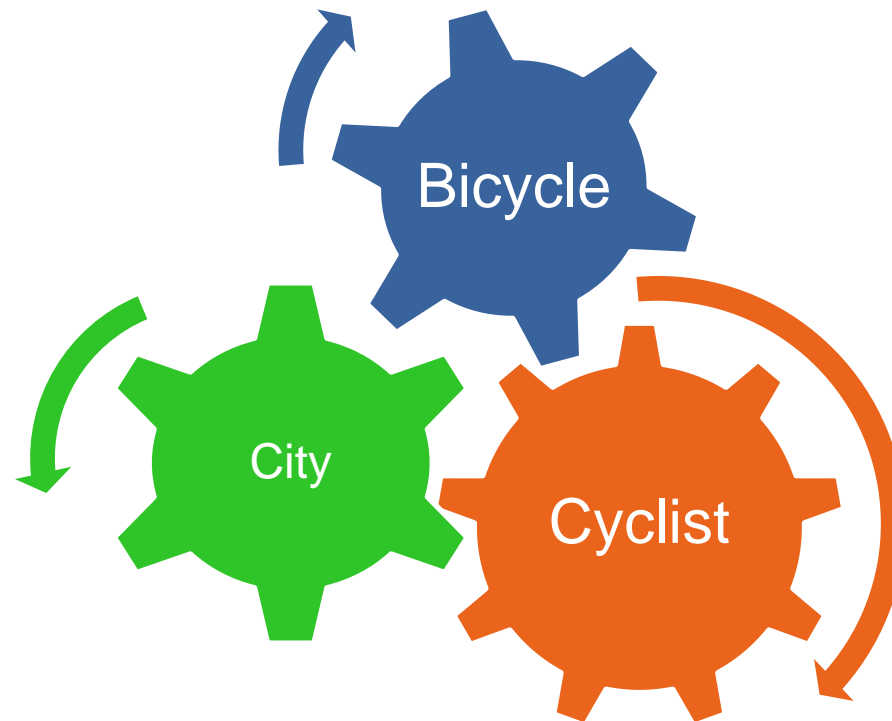

praktische kennis **direct toepasbaar**

**BICYCLE
INFRASTRUCTURE**

TRANSPORTATION SYSTEM

CHARACTERISTICS CYCLIST

- 🚲 Human beings
- 🚲 Muscle power
- 🚲 Open air
- 🚲 Social activity
- 🚲 App 0.75m wide

CHARACTERISTICS BICYCLE

- 🚲 Balance (two wheels)
- 🚲 No suspension,
- 🚲 No crumple zones
- 🚲 No airbags
- 🚲 App. 0.75m wide

CITY - INFRASTRUCTURE (BICYCLE FACILITIES)

- Local opportunities
- Limited space
- Social activities
- Existing patterns and buildings
- Local policy goals

MAIN REQUIREMENTS

- 🚲 Coherence
- 🚲 Directness
- 🚲 Attractiveness
- 🚲 Safety & health
- 🚲 Comfort

COHERENCE

- 🚲 Consistency of quality
- 🚲 Ease of way finding
- 🚲 Mobility chain
- 🚲 Choice for more than one route

DIRECTNESS

- 🚲 No unnecessary detours
- 🚲 Faster than car
- 🚲 Constant speed
- 🚲 Minimum delays

ATTRACTIVENESS

- 🚲 Psychological elements
- 🚲 Perception
- 🚲 Social safety
- 🚲 Go side by side
- 🚲 Use environmental opportunities

SAFETY & HEALTH

- 🚲 Mix if possible, separate when necessary (low speed and low volume)
- 🚲 Infrastructure and land use
- 🚲 Vehicles (technique)
- 🚲 Road users (behaviour)
- 🚲 Alternative parallel (high volume motorized traffic)

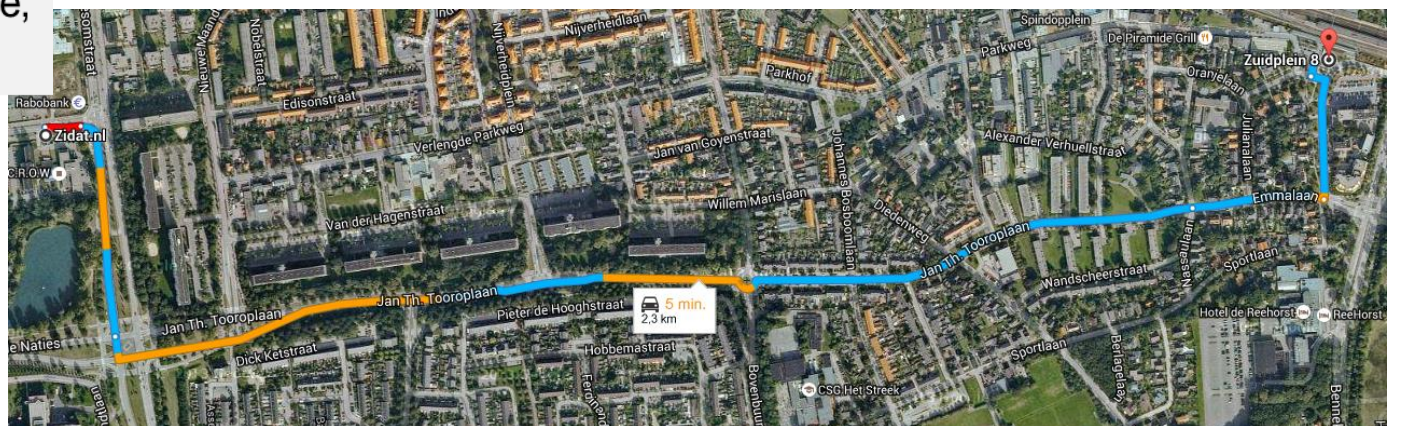

praktische kennis **direct toepasbaar**

EDE

Railway station
– CROW office

-  30km/h-zone (safe)
-  Buildings (safe)
-  Less car traffic (safe, comfort)

COMFORT

- 🚲 Smooth surface
- 🚲 Minimum stops
- 🚲 Protection against weather
- 🚲 Enough space (side by side)
- 🚲 Avoid sharp curves
- 🚲 Design speed 30km/h
(20m/h)
- 🚲 Avoid steep slopes

SAN FRANCISCO - THE WIGGLE

-  Between Market Street and residential areas
-  Follows course of old creek
-  Avoid steep hills
-  Residential area

**THE WHOLE
EQUALS IS MORE
THAN THE SUM OF
ITS PARTS**

))))):

BICYCLE INFRASTRUCTURE AND FACILITIES

Bicycle highways

- Priority
- Tunnels & bridges

Main bicycle network

- Bicycle streets
- Bike lanes
- Seperated bicycle paths

Basic network

- Short cuts
- Recidential streets (30km/h)
- Home zones

praktische kennis **direct toepasbaar**

LAWS, STANDARDS AND GUIDELINES

Basisregel voor ons werk

DEFINITIONS

- 🚲 Law, Royal Degree, order
 - need to be followed
- 🚲 Standard
 - deviate only in very special unforeseen situations
- 🚲 Guideline
 - deviate only with good arguments

GUIDELINES THE NETHERLANDS

- 🚲 Independent, collective
- 🚲 Represents the expertise and experience available in (and sometimes outside) The Netherlands
- 🚲 Used in the court of law

GUIDELINES FOR GOOD DESIGN

Based on:

- 🚲 Sustainable safety
- 🚲 Results of scientific research
- 🚲 Results out of experiments in practice

GUIDELINES FOR GOOD DESIGN

Design in such a way, that:

- 🚲 The road user always knows what is expected from him;
- 🚲 And knows what can be expected from other;
- 🚲 No great differences in mass speed and direction;
- 🚲 The road will be used where it is designed for;
- 🚲 There is no dead penalty on failure.

GUIDELINES FOR GOOD DESIGN

- 🚲 Latest state of science and technology
- 🚲 Standard solutions
- 🚲 Deviate when guideline is not applicable
- 🚲 Custom-made design

GUIDELINES FOR GOOD DESIGN

Deviation is allowed only when:

- 🚲 well-considered;
- 🚲 in the spirit of the guidelines;
- 🚲 suited to the expectations of the road users

CONCLUSIONS

- 🚲 Cyclist is not a pedestrian with wheels
- 🚲 Bicycle facilities need to be tailor-made (use local opportunities)
- 🚲 Handbooks should be for inspiration
- 🚲 Cycling is not just a sport
- 🚲 Cycling is not only for kids
- 🚲 Bicycle is not a poor man's Mercedes
