In order to serve a completing function, consider four factors:
1) Characteristics of the user
2) Characteristics of the destination
3) Quality of the chain
4) Quality of the alternative
Characteristics of the user

- Young
- High educated
- Favouring active modes
- Preferring flexibility
- Different linkages serve different travel purposes
Characteristics of the destination
Quality of the chain
Priority plan for bike parking in Copenhagen

1. Bike parking in construction
2. Conversion of car parking into bicycle parking and flex parking
3. Traditional bike parking
4. Capacity optimization
5. Development of new types of parking facilities
Quality of the alternative
og den røde zone udvides.
