IMPROVE YOUR CITY’S PLACESFORBIKES RATING

COMPLETE THE CITY SNAPSHOT

Insider knowledge from a city staffer gives us insight into your city’s progress for the PlacesForBikes City Ratings. The City Snapshot gathers data on a city’s existing bike infrastructure, new projects and the biggest events to provide a full picture of bicycling in the community.

The 2017 City Snapshot is open. If your city completes a City Snapshot, we will run the Bike Network Analysis for your community, which assigns a score based on the connectedness of its low-stress bike network.

If you aren’t the right person to complete The City Snapshot, please give this postcard to the appropriate staff person.

placesforbikes peopleforbikes.org/citysnapshot

PlacesForBikes is a PeopleForBikes program that helps cities and towns quickly build and connect great places to ride. It features a data-driven, easy-to-understand city rating system and an inspiring annual conference for city and business leaders.
How does your city rate?

Tell us about bike riding where you live and get entered to win great prizes, including a Trek bike.
