Scientists for cycling

General setting & Purpose

THE SCIENTISTS FOR CYCLING COLLOQUIUM
Nantes – June 2, 2015

Bas de Geus
Dept. Human Physiology
Vrije Universiteit Brussel
Scientists for Cycling network

S4C network, launched at the Velo–City Global 2010 conference, arises from the recognition that there is a large number of experts worldwide in many different academic disciplines who are able and ready to contribute to ECF’s mission: to improve and to increase cycling.
Mission Statement

- S4C is a global network of academics and individuals actively engaged in applied research, teaching and dissemination from all disciplines interested in cycling or cycling-related topics.

- The group works to exchange their knowledge and research in order to improve cycling.
Main aims of the network

- Build a strong pro-cycling interdisciplinary scientific community;
- Bridge the gap between the research on cycling issues and cycling advocates;
- Disseminate the latest scientific-based publications on cycling;
- Assist in developing the Velo-city conference program;
- Build up a more research based approach to cycling advocacy.
Specific

- S4C colloquium gives the local organising city and scientists the opportunity to present their latest research results;

- S4C board members review (a part of) the abstracts of the upcoming VeloCity conference;

- Funding?
Input from the today’s meeting

- Today @ 4.00 pm:
- How to strengthen the collaboration between scientists through national (e.g. GERI Vélo) and international (e.g. Scientists for Cycling) networks? What could be the role of the ECF?
