FLOW session
Reaping Economic Benefits of Lower Congestion through more cycling

Jan-Bert Dijkstra
Programme Director
13 June 2017
Land area
41.543 km²

Number of inhabitants
17,000,000

Population density
410 persons per km²

Total number of travel kilometers
184,000,000,000 km

Trips per day per inhabitants
2,7 trips

Modal split as percentage of total number of rides

- Car passenger: 14%
- Car driver: 32%
- Public transport: 4%
- Bike: 27%
- Miscellaneous: 21%

Cars per household

- Households that have at least one car: 75%
- Two cars or more: almost 25%
Optimising Use programme

Working together is key
61% van de bevolking woont binnen 15 km van het werk

25% van alle werknemers gaat op de fiets naar het werk
• Switch from car / bus to bicycle gains up to € 0,50 per kilometer
• Bicycle uses 7-11 times less space
• Cyclists have 1,3 less sick days
• Better health through cycling saves € 18 billion in health-care cost a year
